Password: software Using any FTP software and the information provided below, please download and install the software to your computer. Note: Before downloading the software, check to see if your operating system already has the software. If so, it will be listed in the software folder as a sub-folder called "software". Wii U NTSC R5FW09 D5FW09 V5FW09 B5FW09 J5FW09 PC Software System Requirements: This software is compatible with PC running Windows 7 and newer versions. The software must be installed to your computer's primary hard drive (not a CD or a USB). The hard drive should be partitioned as follows: NTFS (or ReiserFS, or Ext4, or XFS, or whatever your preferred system FS is) partition containing a "Software" folder (where you will download the software), and a "system" folder (where you will install the software). Makes it easy for you to run the software. Please make sure the "Write Protect" switch is set to OFF. Another hard drive or a USB drive (other than the one containing the software) is optional for the software, and is not required to use the software. Important Notes: Windows can sometimes take a long time to install the software to your computer. It is not a problem. If the software doesn't work for you, please make sure you did the following: The hard drive containing the software must be partitioned as described above. Windows should be completely shut down, and the switch to "Safe Mode" should be turned OFF. After you turn off Windows, restart it and download and install the software. If you have an old Windows XP or older operating system, you will need to install a previous version of Windows to run the software. Note: The software is compatible with Windows XP and newer versions. If your Windows 8/8.1/10 update is causing problems with the software, please download and install an earlier version of Windows. If you are already running the latest version of Windows, the software will run fine. Be sure to check with your operating system vendor and/or software developer to find out if they have updated the software. If you are having difficulty installing 82157476af
